## Admission to Deemed Universities

### Counselling Procedure

Online Counselling is Conducted by MCC (Medical Counselling Committee) through website: [www.mcc.nic.in](http://www.mcc.nic.in). MCC conducts 3 Rounds of Counselling: Round-1, Round-2 and Mop-Up round. After Mop-Up round the vacant seats are sent to respective institutes for stray round vacancy (Institute Level Mop Up Round)

The institute level Mop-Up round is conducted offline and students need to reach the institute physically at that time. So, this is the round where Cut-Off remains LOWEST. This Round is final round and conducted during last 2-3 days before Last Date of admission. For student the Most important thing is to know the counselling Schedule and Judge the Correct college to visit, where they stand the maximum chance of seat allotment. Practically a student can be present at only one Institute in 1 day so, at this situation our Premium Package becomes most useful. We deliver you the exact counselling Schedule and Probabilities of Admission.

# PHARMACY (Pharm-D & B-Pharma)

Pharmacy is the science and technique of preparing, dispensing, and review of drugs and providing additional clinical services. It is a health profession that links health sciences with pharmaceutical sciences and aims to ensure the safe, effective, and affordable use of drugs. The professional practice is becoming more clinically oriented as most of the drugs are now manufactured by pharmaceutical industries. Based on the setting, the pharmacy is classified as a community or institutional pharmacy. Providing direct patient care in the community of institutional pharmacies are considered clinical pharmacy.

The scope of pharmacy practice includes more traditional roles such as compounding and dispensing medications, and it also includes more modern services related to health care, including clinical services, reviewing medications for safety and efficacy, and providing drug information. Pharmacists, therefore, are the experts on drug therapy and are the primary health professionals who optimize use of medication for the benefit of the patients.
